

EUROTHERM® FLEXIBLE SOLUTIONS

Eyris™

SOFTWARE FOR DATA MANAGEMENT...

KNOWLEDGE IS POWER

Knowledge is Power

One Package to view all your Eurotherm® Paperless Graphic Recorders

Simple, Vigilant and Dynamic

Your data is an important part of your plant operation. It is the 'eye' onto your process and gives you the knowledge and security to make the right decisions. Eyris for Data Management, a simple to use software package, enables fast and easy access to all your Eurotherm paperless graphic recorders and puts this knowledge at your fingertips.

Central to the philosophy of Eyris software is the ability to see 'the big picture', yet have easy access to individual instruments. The 'Zoom' capability accesses trouble spots in a quick and dynamic manner, so that at a glance you see anything that needs attending to. Eyris software offers the information and power you need to react in a timely manner from a central or network location.

Just run the Eyris Builder facility and start a network scan. The Eyris package will auto detect all the 5000 and 6000 Series paperless graphic recorders on your network.

- RUN Eyris Builder
- START The network scan
- SELECT The instruments for your project
- DONE View using the Eyris Browser

Default Configuration

Eyris software provides a default configuration of viewable pages for the easiest route to your data. Of course you can select to create a set of custom pages to best fit your application.

Visualisation in Moments

Eyris Builder Module

Building an Eyris project couldn't be simpler and does not incur costly engineering. Simply run Eyris Builder software, start a network scan and select the instruments you need to add to the project. Built in wizards guide you to a completed project with default pages within minutes. The default pages include an overview of all recorders, individual multi instrument view pages and a dynamic page. A simple click of the 'Run Browser' button starts Eyris Browser facility and straight away the system is ready for use.

If preferred, with very little effort, the user pages can be adapted in the Eyris Builder utility to suit or mimic the process configuration. Pages can be renamed; the layouts can be modified to be tiled, vertical or horizontal. Even the individual instruments or indeed individual groups and views on the instruments can be laid out as required.

Eyris Browser Module

The Eyris Browser module can be quickly run direct from the Eyris Builder software or from an icon that can be created on your desktop. The Browser provides an immediate view of all Eurotherm graphic recorders in the project with the overall status of each instrument displayed on the Overview page. A single button click gives access to pages displaying either multiple instruments or group views, perhaps from a logical plant or equipment point of view. Of special interest is the runtime adaptable Dynamic page where views for relevant instruments or groups can be brought together on a 'scratch' basis as needed.

Any alarm on any connected instrument is clearly asserted by flashing the title banner for each page. The status display also makes messages, instrument system alarms and connection data clear to see.

Eurotherm: International sales and service

Understanding and providing local support is a key part of Eurotherm's business. Complementing worldwide Eurotherm offices are a whole range of partners and a comprehensive technical support team... to ensure you get a service you will want to go back to.
